Overview

Choosing the right company for IT support is a significant factor in ensuring your company operates a reliable network infrastructure. Ashgoal provide both remote and on-site IT support and have ensured that IT support isn't taxing for Cartwrights Accountants.

Background

Cartwrights are a team of specialist accountants specialising in financial management, accounting and taxation. The company provides high quality and focused financial input that needs a secure, reliable and productive IT infrastructure.

The company uses specialist accounting software that operates locally from on-site servers. Any downtime or system outages severely impact on the productivity of the entire Cartwrights team, so both the Software and Hardware needs to be carefully monitored and updated.

Benefits

Ashgoal provides a quick and reliable IT support package for Cartwrights, with scheduled updates, on-going management and pro-active maintenance.

The company benefits from an extremely reliable network, which allows the accounting software to run efficiently and helps Cartwrights provide a better service for their customers.

Support queries are handled in a number of ways for Cartwrights to make it as convenient as possible. Telephone, remote and on-site support options are available for them to utilise when needed and Director Ahsan Khan BA (Hons) FCCA remarks that:

'We are extremely happy with the support that Ashgoal provides us, it allows us to concentrate on what we do best. We look forward to a successful on-going partnership.'
