

Virtual VOIP is a *Cloud hosted phone system*

Virtual VOIP – A fully managed cloud hosted phone system on VOIP

The Virtual VOIP cloud hosted phone system is the perfect choice for:

- Single or multi-site SMEs
- It is designed for companies with up to 50 extensions and businesses with home or remote workers who need to seamlessly connect into the office environment
- Lower call costs and a maintenance free system
- Capabilities such as auto-attendant, call recording and voicemail

What is hosted VOIP?

VoIP (Voice over Internet Protocol) technology allows users to make free between site calls over the internet. In a business context, this technology can be used to allow any company to take advantage of low cost calls.

Virtual VOIP provides all the features of a traditional phone system such as auto-attendant and voicemail over an internet connection, which removes the need for a physical phone system in your office.

Benefits of using Virtual VOIP

- Lower call costs
- Up to 70% cheaper than other phone systems
- Eliminates line rental costs
- Many additional call features such as voicemail and auto-attendant
- Can use existing broadband connections
- Total disaster recovery
- Existing numbers can be transferred
- Free global calls between sites, incl. home workers
- No capital outlay on equipment or infrastructure
- Improved company image and efficiency
- Fast and professional support
- Free software upgrades and maintenance free
- No office move costs

Our preferred handset

With hundreds of features and configurable service parameters, the Cisco SPA504G addresses the requirements of traditional business users while building on the advantages of IP telephony.

- Full-featured 4-line business-class IP phone
- Simple and convenient user interface
- Speakerphone
- Delivers superior voice clarity
- 4-way rocking directional knob for menu navigation

About Ashgoal

Ashgoal were established in 1979 and are one of the original IT companies. We provide telecoms services to many companies across the UK, offering excellent levels of service across a range of platforms.

In addition to our telecoms packages we also offer the following services:

IT Support

We have three IT support packages, with different levels of service. This means that we can always deliver the support your company deserves and expects.

Software

Ashgoal offer a range of business applications and software packages to suit small businesses. This includes both local server based applications and those installed on a cloud infrastructure.

Cloud

We offer flexible business server Cloud packages that are flexible, reliable and cost effective. All are fully managed and supported 24/7, 365 days a year. We are a local company meaning you are not dealing with a faceless company and we offer excellent SLA's.

Sage and Act Software

We have been in partnership with Sage since the 1980's and are a Sage Platinum Partner, we provide Sage accounts sales and support for Sage 50, Sage 200 and Sage Act, including Act SAAS.

Website design & SEO

Our website design and promotion team provide excellent bespoke websites and are an accredited Google Partner, ensuring that not only will you receive a great website, but also high rankings on Google and other search engines.
